

From question to evidence, *in seconds*

Save time with ScienceDirect AI: discover critical evidence tied directly to its original source.

What is ScienceDirect AI?

ScienceDirect AI enables researchers to **explore, compare and uncover insights** from deep within millions of full-text, peer-reviewed scientific papers and book chapters, with just one click.

Accelerate your research

Use ScienceDirect AI & get summary responses, for more insights with less noise

1. Enter your query by describing what you are looking for in your own words

2. Your query gets optimized so you don't have to worry about that

3. Get a response rooted in full-text, peer-reviewed literature including citations and referencing specific passages from one or more documents

How will *you make the most of* ScienceDirect AI?

- **Summary answer:** a bespoke response to your question citing and surfacing specific source-passages.
- **Related insights:** distilled insights from the underlying content returned in each search.
- **Experiment comparison:** a table of all studies related to your query, including comparisons of each study's goals, materials, methods, results and conclusions.
- **My Library:** save and view the papers you've now discovered, in one convenient place.

Your library is proud to support your research needs

Ask our librarians how you can
start going from question to
evidence in seconds, not days,
with ScienceDirect AI.
